# INDEX TO VOL. LXXVIII. (B)

Adami (J. G.) and Aschoff (L.) On the Myelins, Myelin Bodies, and Potential Fluid Crystals of the Organism, 359.

Alcock (N. H.) The Action of Anæsthetics on Living Tissues. Part II.—The Frog's Skin, 159.

Anæsthetic and lethal quantity of chloroform in blood (Buckmaster and Gardner), 414.

Anæsthetics, action on living tissues. Part II.—Frog's skin (Alcock), 159.

Armstrong (H. E.) and Ormerod (E.) Studies on Enzyme Action.—Lipase: II, 376.

Arrow-poison, physiological action of a recently discovered African (Bolton), 13.

Aschoff (L.) See Adami and Aschoff.

Bacteria, action of high-frequency electrical discharges on (Foulerton and Kellas), 60.

Bashford (E. F.), Murray (J. A.), and Bowen (W. H.) The Experimental Analysis of the Growth of Cancer, 195.

Blood, viscosity of (Denning and Watson), 328.

Bolton (C.) On the Physiological Action of a recently discovered African Arrow-poison, 13.

Bone, regeneration of (Macewen), 237.

Bowen (W. H.) See Bashford, Murray, and Bowen.

Buckmaster (G. A.) and Gardner (J. A.) The Anæsthetic and Lethal Quantity of Chloroform in the Blood of Animals, 414.

Cancer, experimental analysis of growth of (Bashford, Murray, and Bowen), 195.

Carbon assimilation in plants, mechanism of (Usher and Priestley), 318.

Carbon dioxide, photolytic decomposition *in vitro* (Usher and Priestley), 318.

Cassava (*Manihot aipi* and *M. utilissima*), occurrence of phaseolunatin in (Dunstan and Henry), 152.

Chapman (H. G.) See Welsh and Chapman.

Chloroform in blood of animals, anæsthetic and lethal quantity of (Buckmaster and Gardner), 414.

Croonian Lecture. See Langley, 170.

Cyanogenesis in plants, Parts IV and V (Dunstan and Henry), 145, 152.

Denning (A. du P.) and Watson (J. H.) The Viscosity of the Blood, 328.

Dourine, microscopic changes in nervous system in a case of (Mott), 1.

Dunstan (W. R.) and Henry (T. A.) Cyanogenesis in Plants. Part IV.—The Occurrence of Phaseolunatin in Common Flax (*Linum usitatissimum*), 145.

Edmunds (A.) See Mott, Halliburton, and Edmunds.

Embleton (A. L.) See Walker (C. E.) and Embleton.

Embley (E. H.) The Pharmacology of Ethyl Chloride, 391.

Enzyme action, studies on (Armstrong and Ormerod), 376.

Ethyl chloride, pharmacology of (Embley), 391.

Ferment, alcoholic, of yeast-juice (Harden and Young), 369.
FitzGerald (M. P.) An Investigation into the Structure of the Lumbo-sacral-coccygeal Cord of the Macaque Monkey (*Macacus sinicus*), 88.
Fluid crystals of organism (Adami and Aschoff), 359.
Foulerton (A. G. R.) and Kellas (A. M.) The Action on Bacteria of Electrical Discharges of High Potential and Rapid Frequency, 60.
Frog's skin, action of anæsthetics on (Alcock), 159.

Gardner (J. A.) See Buckmaster and Gardner.
*Glossina palpalis* in relation to *Trypanosoma gambiense*, etc. (Minchin, Gray, and Tulloch), 242.
Gray (A. A.) Observations on the Labyrinth of certain Animals, 284.
Gray (Lieut. A. C. H.) See Minchin, Gray, and Tulloch.

Halliburton (W. D.) See Mott, Halliburton, and Edmunds.
Harden (A.) and Young (W. J.) The Alcoholic Ferment of Yeast-juice. Part II.—The Co-ferment of Yeast-juice, 369.
Hemsley (W. B.) On the Julianiaceæ, a new Natural Order of Plants, 231.
Henry (T. A.) See Dunstan and Henry.
Herring (P. T.) and Simpson (S.) On the Relation of the Liver Cells to the Blood-vessels and Lymphatics, 455.
Hill (J. P.) See Wilson (J. T.) and Hill.
*Hydatina*, sex-determination in (Punnett), 223.

Julianiaceæ, new natural order of plants (Hemsley), 231.

Kellas (A. M.) See Foulerton and Kellas.

Labyrinth of animals, observations on (Gray), 284.
Langley (J. N.) On Nerve Endings and on Special Excitable Substances in Cells (Croonian Lecture), 170.
Leucocytes, observations on life-history of (Walker), 53.
*Linum usitatissimum*, occurrence of phaseolunatin in (Dunstan and Henry), 145.
Lipase, studies on enzyme action (Armstrong and Ormerod), 376.
Liver cells, relation to blood-vessels and lymphatics (Herring and Simpson), 455.
Lumbo-sacral-coccygeal cord of Macaque monkey (*Macacus sinicus*) (FitzGerald), 88.

*Macacus sinicus*, structure of lumbo-sacral-coccygeal cord of (FitzGerald), 88.
Macewen (Sir W.) Communication on Regeneration of Bone, 237.
*Mal de coit*, microscopic changes in nervous system in case of (Mott), 1.
Minchin (E. A.), Gray (A. C. H.), and Tulloch (F. M. G.) *Glossina palpalis* in its relation to *Trypanosoma gambiense* and other Trypanosomes (Preliminary Report), 242.
Mott (F. W.) The Microscopic Changes in the Nervous System in a Case of Chronic Dourine or *Mal de Coit*, and Comparison of the same with those found in Sleeping Sickness, 1 ; —— Halliburton (W. D.) and Edmunds (A.) Regeneration of Nerves, 259.
Murray (J. A.) See Bashford, Murray, and Bowen.
Myelins and myelin bodies (Adami and Aschoff), 359.

Nerve endings and special excitable substances in cells (Langley), 170.
Nerves, regeneration of (Mott, Halliburton, and Edmunds), 259.

Ormerod (E.) See Armstrong and Ormerod.
Ornithorhynchus, development of (Wilson and Hill), 313.

Parthenogenesis, remarks on (Punnett), 223.
Phaseolunatin, occurrence in *Linum usitatissimum* (Dunstan and Henry), 145 ; —— in Cassava (*Manihot*), 152.
Photographic action of plants in the dark (Russell), 385.
Plants, action of, on photographic plate in dark (Russell), 385.
"Precipitable" substance, main source of, and *rôle* of homologous proteid in precipitin reactions (Welsh and Chapman), 297.
Priestley (J. H.) See Usher and Priestley.
Proteid, homologous, *rôle* of, in precipitin reactions (Welsh and Chapman), 297.
Punnett (R. C.) Sex-determination in *Hydatina*, with some Remarks on Parthenogenesis, 223.

Russell (W. J.) The Action of Plants on a Photographic Plate in the Dark, 385.

Sertoli or foot-cells of testis, origin of (Walker and Embleton), 50.
Sex-determination in *Hydatina* (Punnett), 223.
Simpson (S.) See Herring and Simpson.
Sleeping sickness, microscopic changes in nervous system compared with those in a case of chronic dourine (Mott), 1 ; —— relation to Gambian Fever (Thomas), 316.

Testis, origin of foot-cells of (Walker and Embleton), 50.
Thomas (H. W.) Remarks on Mr. Plimmer's Note on the Effects produced in Rats by the Trypanosomata of Gambian Fever and Sleeping Sickness, 316.
*Trypanosoma gambiense*—relation to *Glossina palpalis*, etc. (Minchin, Gray, and Tulloch), 242.
Trypanosomata of Gambian Fever and Sleeping Sickness, effects in rats (Thomas), 316.
Tulloch (Lieut. F. M. G.) See Minchin, Gray, and Tulloch.

Usher (F. L.) and Priestley (J. H.) The Mechanism of Carbon Assimilation in Green Plants : the Photolytic Decomposition of Carbon Dioxide *in vitro*, 318.

Walker (C. E.) Observations on the Life-history of Leucocytes, 53 ; —— and Embleton (A. L.) On the Origin of the Sertoli or Foot-cells of the Testis, 50.
Watson (J. H.) See Denning and Watson.
Welsh (D. A.) and Chapman (H. G.) On the Main Source of "Precipitable" Substance and on the *Rôle* of the Homologous Proteid in Precipitin Reactions, 297.
Wilson (J. T.) and Hill (J. P.) Observations on the Development of Ornithorhynchus, 313.

Yeast-juice, the co-ferment of (Harden and Young), 369.
Young (W. J.) See Harden and Young.

END OF THE SEVENTY-EIGHTH VOLUME (SERIES B).

HARRISON AND SONS, Printers in Ordinary to His Majesty, St. Martin's Lane.
